

SUSI assessment template

Name of service _____

Name: _____ DOB: _____

Date of assessment: _____ Age of child at assessment: _____

Location of screening: _____

Informants: _____ Relationship to child: _____

General information

The children and parents complete a range of standardised and reliable measures, including the Ages & Stages Questionnaire: Social-emotional (ASQ:SE), as part of this assessment. These measures contribute to the profile of the child's developmental and social-emotional needs.

In thinking about the results from the questionnaires, and home visit where applicable, we have considered other factors and information available to us including the child's health and general development, the timing of the screening, and cultural factors.

Any specific comments or concerns that have been shared with us by parents or carers during the assessment have also contributed to this profile of the child and any recommendations we may make.
